Dedicated **IT classrooms** can be a drain on teaching space, tying up vast areas to house computer hardware whilst extension groups and other activities are accommodated in inappropriate rooms.

Flipscreen™ integrated IT classroom desks solve these issues by concealing IT equipment within the furniture when not in use, leaving a clear and flexible workspace. Furthermore, security is enhanced – lids can be lockable and CPUs housed in fully enclosed hi-secure caddies. But when in use, cables are tucked neatly away – safely from tripping feet or probing fingers.
